

Environmental Policy

We are committed to providing a superior product, whilst minimizing adverse impacts to the environment.

We care about the environment and not only recognise but appreciate that our operations may have an impact on the environment locally and ultimately globally. At Gregory Commercial Furniture we believe it is our obligation to consider all aspects of our products' impact on the environment, throughout their lifecycle: From raw material selection, right through to sustainable production methods as well as the reduction of waste and pollution in all aspects of our manufacturing process.

We are and will continue to address the latest environmental issues through our ISO14001 Environmental Management System, which is under constant review and assessment so as to ensure that it continually evolves to suit the ever-changing needs of the environment we live in, our customers, the legislation that we must adhere to as well as our corporate needs.

We are committed to continual improvement in all aspects. This is reflected in our ISO 9001 accreditation, of which environmental concerns forms a substantive part.

Our commitment to the environment is also reflected in our stated aim to achieve the best environmental ratings outcome possible, for our entire product range.
